

**“Since installing the PulseFlow® system in our laundry,
we have increased hourly production by 30%
and at the same time washing quality has improved.”**

**– Roberto and Massimiliano Spolaore,
*LSG Laundry, Venice, Italy***

After 23 years of continued use, LSG Laundry recently replaced their GI CBW® tunnel with a new 8-mod 50 kg PBW™ tunnel, 40-bar single stage press, and three pass-through dryers. The new system features touchscreen Mentor® control, live camera feed from the load chute, RecircONE® pump, and infrared sensors in the dryers. Their new 8-mod PBW™ tunnel has allowed LSG Laundry to enjoy increased productivity and excellent wash quality.

To find out how PulseFlow Technology can increase your production and improve your wash quality, visit the Milnor stand **(Hall 2 - Booth V21-Z30)** at **DETERGO**, contact an authorized Milnor distributor or call Milnor International +32 2 720 5822.
