

“Only Milnor could offer the combined technology and support we expect.”

– Rick Hamlin, *Crown Health Care, Columbia, MS*

When Crown Health Care Laundry Services opened its fourth plant, it enlisted the help of longtime partner Pellerin Laundry Machinery Sales Company to design, equip, and install the most efficient laundry possible. The end result was a state-of-the-art laundry featuring two 76039 PulseFlow® Technology 10-module tunnels that creates a continuous workflow by integrating an E-Tech rail system to transport linen through the plant. Their Milnor 6464 dryer pod with GreenFlex™ Dryer Mode accepts new loads immediately after the discharge of the clean goods. This facility is designed to process over 25,000,000 lbs. of healthcare linen per year in a single shift operation, while consuming less than 0.5 gal/lb. Hamlin notes that “the project was seamless thanks to the combined efforts of Pellerin and Milnor.”

To find out how Milnor’s PulseFlow® Technology and GreenFlex™ Energy Mode can reduce your laundry’s utility consumption, contact an authorized Milnor distributor or call 504-712-7656.
