✧ It is the sole responsibility of the owner/user to assure that the floor and/or any other supporting structure exceeds not only all applicable building codes, but also that the floor and/or any other supporting structure for each washer-extractor or group of washer-extractors has sufficient strength and rigidity (i.e., a natural or resonant frequency many times greater than the rotational machine speed with a reasonable factory of safety) to support the weight of all the fully loaded machine(s) including the weight of the water and goods, and including the published 360° rotating sinusoidal RMS forces that are transmitted by the machine(s). Contact the factory for additional machine data for use by a structural engineer.

SUSPENDED WASHER-EXTRACTOR

SPECIFICATION SHEET

Standard Features:

- MilTouch-EX™ control
- Programmable overnight bath soak
- Programmable water temperature for each bath
- Dynamically-tuned suspension system
- Spherical roller bearings
- High percentage of open area cylinder perforations
- Single motor inverter drive
- 21° Tilting forward and backward
- Eight (8) liquid chemical injection ports
- Control reads in English/second language
- 5-year limited warranty on frame, cylinder & shell
- Removable hub for easy access to bearings
- Active balancing accommodates bulky items (mats and partial batches)

Optional Features:

- Reuse water inlet
- Load chute door
- Five compartment flushing injector
- Light curtain (required for manual and semi-automated operation)

Why Purchase Milnor?

- 75.6 cu ft. (2141 L) cylinder allows for more goods to be processed at a time. **BENEFIT: Greater capacity leads to increased efficiency and less production hours.**
- MilTouch-EX™ Controller has intuitive fault diagnosis and relevant troubleshooting suggestions, which streamlines employee training and eliminates operator guesswork. Controller also provides diagnostic and error messages. Shortens training time of new employees. **BENEFIT: Fewer operator errors.**
- 300-G high extract provides excellent moisture removal. Lower extract speeds are available for uniforms, delicate textiles and blended fabrics. **BENEFIT: Better extraction saves dryer fuel.**
- Eight liquid chemical ports and 15 signals. **BENEFIT: Promotes consistency and allows flexibility.**
- Larger cylinder perforated-area generates better wash quality, better rinsing and better extraction. **BENEFIT: Better extraction saves dryer fuel.**
- Faster process times reduce fabric wear, promoting longer linen life! **BENEFIT: Saves linen replacement costs.**
- Superior product support through local, highly-skilled dealers. **BENEFIT: Faster repairs mean less downtime.**

Safe chemical injection

SmoothCoil™ suspension minimizes transmission of unwanted vibration

Bearings have quadruple seal protection
