### Why Purchase Milnor M333?

#### Engineer Driven Design That is Built to Last

Our dryers showcase an engineer-driven approach to design. Bearings are permanently lubricated on the motor and drive system. There are no chains used; rather, we use V-belts and pulleys for smooth, quiet, and trouble free operation. Our dryer cabinets are electrostatically powder-painted inside and out then baked at 420-degrees fahrenheit before final assembly - ensuring the hardest surface and the longest lasting finish in the industry.

#### Rugged Steel Door with Gasketless Door Glass

Our dryer doors are one solid piece of steel with gasketless glass. This eliminates the issue of glass falling out due to wear and tear on rubber gaskets that some manufacturers use to secure their glass. The security and durability that gasketless glass provides is essential to longevity.

#### More for Less

The M333 incorporates all the state-of-the-art design features from the leader in stack dryer design-with simple controls, an easy-to-read LED screen and a large lightweight lint drawer that is accessible and easy to clean--only requiring cleaning once a day. It's fine stainless steel lint screen is standard. Available for coin or card ready, the M333 gives you all the benefits of Milnor quality engineering at a low cost.
