About the Manual Identifying Information on the Cover

The front cover displays pertinent identifying information for this manual. Most important, are the published manual number (part number) /ECN (date code). Generally, when a replacement manual is furnished, it will have the same published manual number, but the latest available ECN. This provides the user with the latest information applicable to his machine. Similarly all documents comprising the manual will be the latest available as of the date the manual was printed, **even though older ECN dates for those documents may be listed in the table of contents.**

When communicating with the Milnor factory regarding this manual, please also provide the other identifying information shown on the cover, including the publishing system, access date, and whether the document ECN's are the latest available or exact.

References to Yellow Troubleshooting Pages

This manual may contain references to "yellow pages." Although the pages containing troubleshooting procedures are no longer printed on yellow paper, troubleshooting instructions, if any, will be contained in the easily located "Troubleshooting" chapter or section. See the table of contents.

SUBJECT: FILL HOSES FOR 3016BWE AND 3621BWE MACHINES

Gentlemen:

We have recently been supplied with a new fill hose, which has a 1 3/4" cuff on one end and a 2" cuff on the other. The old hose had 1 3/4" cuffs on both ends. The supplier, from whom we purchased these for years, discontinued making that particular hose and we can't find a new source for the 1 3/4" x 1 3/4" hose.

Because of the different size cuffs on each end, it is necessary to send out a new spray nozzle kit of the stainless steel type presently used in production. This is to replace the old cast type spray nozzle elbows, since the 2" cuff would be entirely too large for it. Please be careful in installation. The 1 3/4" end goes on the water pipe, not the spray nozzle.

Please order kits as follows:

<u>KIT #</u>	<u>DESCRIPTION</u>
PK10-0012A	Hose, Clamps, Glue & Spray Nozzle
PK10-0012	Hose, Clamps, & Glue

We will send PK10-0012A for all orders unless specifically requested to ship without the spray nozzle. Never request PK10-0012 unless you are absolutely sure that the stainless steel door spray nozzle (P/N W2-10583-stainless steel with 90° elbow) is installed.

Whenever in doubt, always order the PK10-0012A. You may return the unneeded spray nozzle parts for credit.

To attempt to install this larger cuff hose on the older spray nozzle inlet is an unsafe practice.

Thank you for your support in converting to the new size fill hose.

Very truly yours,
PELLERIN MILNOR CORPORATION
